***Allowable Subject Matter***

1. Claims 1, 3-13, renumbered as 1-12 respectively are allowed.

***Reasons for Allowance***

2. The following is statement of reasons for the indication of allowable subject matter:

Regarding claims renumbered as 1, 3, 7 and 9, the prior art of reference Zhang teaches a bit-rate conversion device applicable to a single or to multiple MPEG encoded audio-video streams under the control of a rate controller. The prior art references to Elstermann teaches extracting null packets from a transport stream, to record the number of extracted null packets in an annotation packet, and to re-insert the null packets after transmission but the packets recovered from the transport stream are stored before regenerating a stream with null packets. The prior art references to Steer relates to mobile telephone communications, and uses a completely different scheme based on orthogonal signals. The prior art of record fails to reasonably show or suggest making a constant bit-rate transport stream capable of being transmitted in by ACM transmitter, along a variable capacity channel which is characterized by the claim limitation when taking the claim as a whole.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
